

Covid Advisory for Parents & Students

TMSGRN/CIRC/23-24/05

11th April' 2023

Dear Parents/ Guardians,

Greetings from The Millennium School, Greater Noida (W)!

We hope you and your family are keeping well. As a school, the health and safety of our students & staff members are of the utmost priority for us. In the last few years, we have witnessed the gaps in learning and health risks imposed by the outbreak of the pandemic. The Millennium family stood together in curbing the spread of the virus and ensuring the delivery of learning for our students, against all odds, by observing what was necessary. As the Covid-19 cases continue to rise once again all over the nation, it becomes our foremost responsibility to follow precautionary measures to prevent the potential spread of infection on our campus amidst the alarming surge.

Creating awareness among students about preventive interventions is the first step. Keeping this in mind, we've listed below a few **important guidelines to help prevent/reduce transmission** of not just Covid-19 virus but also other communicable seasonal flus.

- All students must wear a face mask to school that fits well and is comfortable. Please
 ensure that your child carries a backup mask to school and that both masks are labelled
 to avoid getting confused with other children's masks.
- All students must carry their own belongings (water bottles, lunch boxes, sanitizers, stationery, etc.) that are properly labelled. To minimise contact, we encourage them not to share their personal belongings with fellow students.
- Avoid sending your child to school if they experience cough, cold, fever, shortness of breath, or other flu-like symptoms, and contact a doctor immediately to get tested.
 Please ensure that the school is notified about the same.
- All students **over the age of 12 must get vaccinated**. Please notify the class teachers about the vaccination status and travel history of your child.
- To ensure your personal safety and that of your child, please avoid public gatherings (like travelling to or visiting crowded places). Ensure that you follow social distancing, wear your masks in public, and avoid contact with anyone who is experiencing flu-like symptoms.

 Please encourage the child to wash hands with soap and water for at least 20 seconds or use an alcohol-based hand sanitizer (with at least 60% alcohol content), especially before

& after meals and using the toilet.

• Please encourage your child to **follow important social etiquette** (such as using a handkerchief over the mouth while coughing or sneezing; sanitising the belongings before

use; avoiding touching their face or mouth after touching walls, staircases, desks, etc.).

You are requested to take initiatives to teach children these simple public health measures that

will go a long way in preventing the spread of viral diseases.

Please be assured that we are following appropriate measures for screening, safe operations,

prevention, and control of COVID-19 on our campus.

• All our staff members are vaccinated and adequately informed to follow preventive

measures.

• We have restricted the entry of visitors during school hours to avoid contact or

interruptions.

• We have **separate entry & exist gates** and passages for students & visitors.

• No one is allowed inside the classrooms without a **proper mask** and **thermal check**.

• All teaching-learning activities are being conducted, keeping in mind the necessary social

distancing protocols.

• All our classrooms, activity rooms, and other public areas are regularly cleaned, sanitised,

and disinfected. The building is well-lit and properly ventilated.

• There is adequate availability of soap, water, sanitizer, and equipment for safe garbage

disposal in the building.

• A **dedicated doctor and nurse** are available in the **school infirmary** to ensure the medical

safety of students on campus.

As a school, we are committed to creating a safe, nurturing, and healthy environment for our

students and staff and request your vigilance and cooperation regarding the same.

Please take care and stay safe!

Warm Regards,

Alimani Tyagi.

Dr Himani Tyagi
